

Lx3 Flash

THE NEXT GENERATION OF ENHANCED SIGN SOLUTIONS

Lx3 Flash

THE NEXT GENERATION OF ENHANCED SIGNS

AN ADAPTABLE, AFFORDABLE ENHANCED SIGN SYSTEM

OPTIMISED ENERGY CONSUMPTION

New LED technology combined with our triple flash mode allows for a significant reduction in energy consumption without reducing the number of lights

REINFORCED SAFETY

Lx3 Flash attracts the attention of road users and makes your road information signs more dynamic:

- Double flash
- Triple flash
- Flashing

INCREASED VISIBILITY

- Triple flash mode delivers light, increasing visibility
- The built-in light sensor adjusts the brightness of the LED

OPTIONS

To prevent your signs from blending into the background, this system features a range of detection and activation options. This helps to ensure that the Lx3 Flash is activated only when needed.

RADIO

To synchronise several Lx3 Flash units

BLUEVIA

Bluetooth traffic sensor

TIMER

To program operating hours

RADAR

Lx3® lights up if a vehicle is detected or exceeds a certain speed

PUSH BUTTON

For manual activation

ILLUMINATED SIGNS FOR OPTIMAL VISIBILITY

Based on the best seller Lx3® sign format, Lx3 Flash uses LED lights to make sure road users get the information they need to know:

- Panel and frame made of aluminium, Category 2 reflective adhesive film, standard road sign format
- Message highlighted with red (border), orange and white (symbol) LEDs, light sensor adapts the brightness of the LEDs in response to the ambient light level

A VALUABLE PREVENTION TOOL, ADAPTABLE TO THE CONTEXT AND THE EQUIPMENT ALREADY IN PLACE
